Workflow automation market is expected to increase to more than **\$78 billion by 2030***

*Acumen Research and Consulting - Workflow Automation Market Size, Share, Analysis Report And Region Forecast, 2022 - 2030

\$78 billion

Growth Drivers

Increasing Development of Automation Technologies

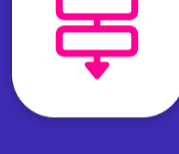

Growing Adoption of IoT, AI and Digitalization

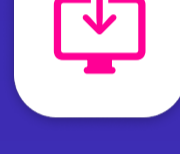

Implementing Automated Workflows in Organisations

"To successfully incorporate automation into your organization, you'll need more than just a tool or script. Here are some tips to get started."

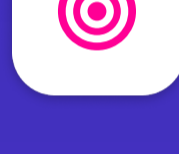

Start with a plan

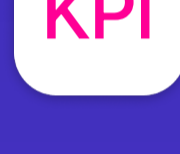

A flowchart documenting a process scheduled for automation.

Systems involved to determine the requirements for the workflow-automation tool

Identify the current pain points of that process

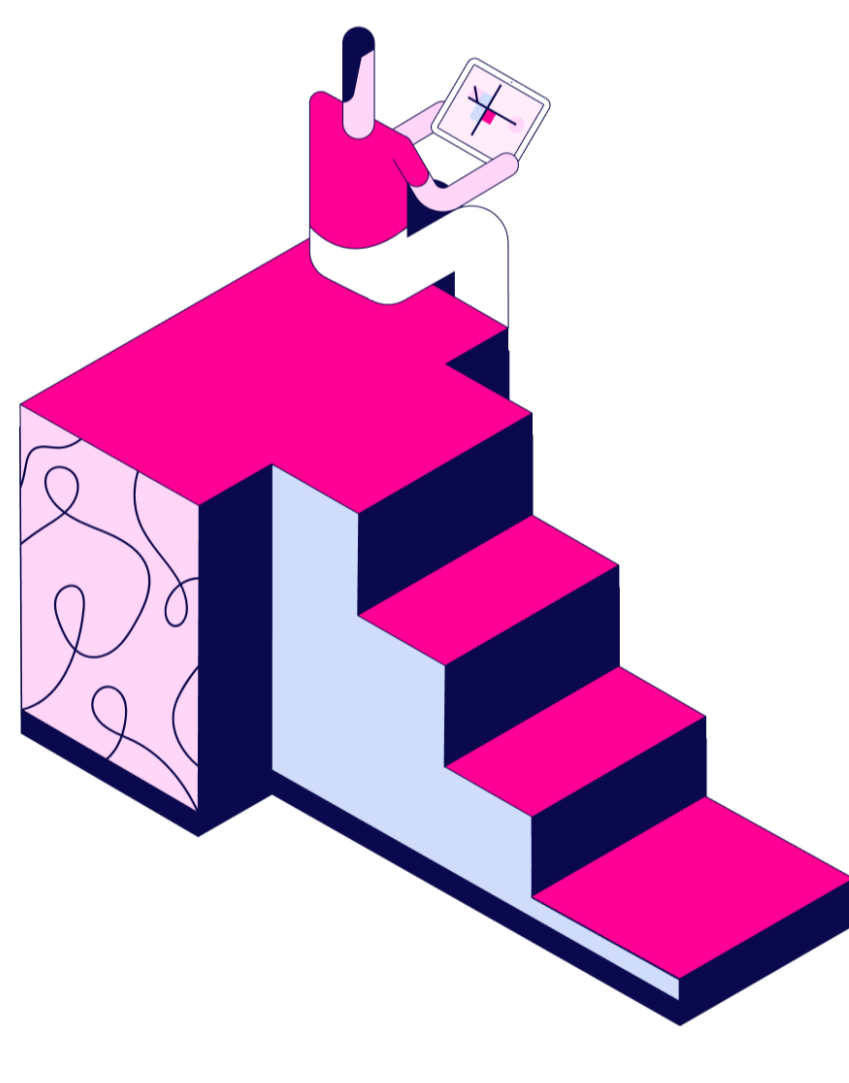

Define KPIs that a workflow-automation solution must be weighed to solve pain points

Continuously measure if the workflows meet the goals

Select and Deploy Your Tool

Start shopping for workflow-automation solutions based on your specific needs

Things to consider

Price

Functionality

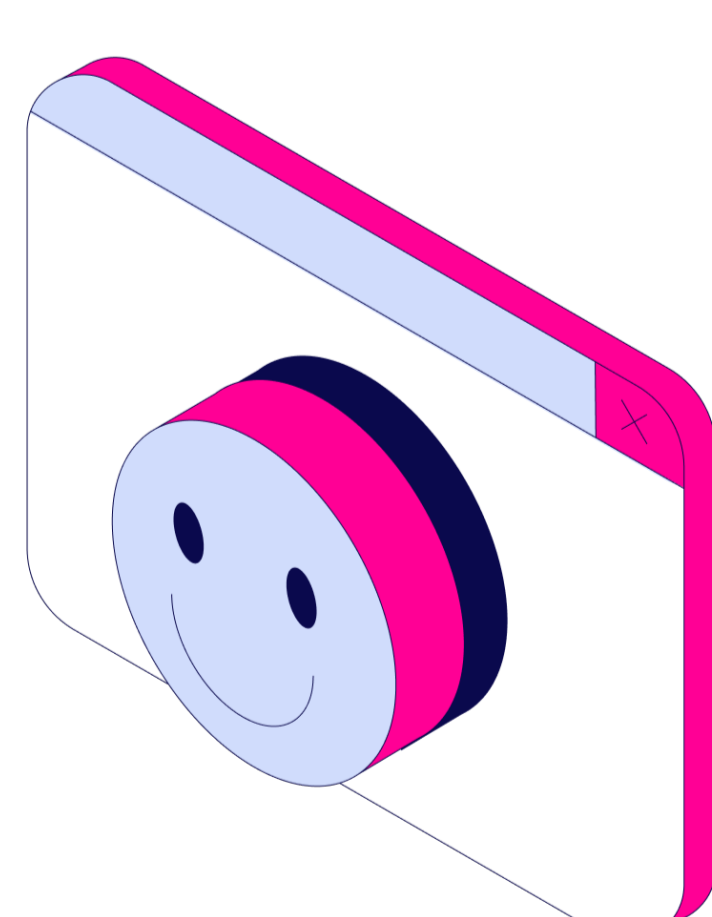

Integrability with current systems

Deployment speed

Skills required to use the solution

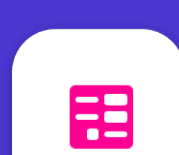

Important: The Human Aspect

Making sure that there is always someone to take care of the automation will ensure its long-term success. Striking balance between automation and personalization.
